

Heat Transfer Textile Graphics Solution

GERBER HEAT TRANSFER FILM IS PERFECT FOR YOUR APPAREL APPLICATIONS AND IS EASY TO USE WITH YOUR GERBER EDGE® THERMAL TRANSFER PRINTER. SAVING YOU TIME AND MONEY.

The GERBER EDGE® is Heating Up Even More.

Gerber Heat Transfer film is a thermally-printable, white, opaque flex material designed for printing on the GERBER EDGE, GERBER EDGE II and GERBER EDGE FX™ using standard GerberColor™ Spot and Process foils. This product offers excellent image quality and washability on a variety of fabrics, including cotton, polyester and less standard polyamide substrates such as nylon.

Benefits:

- No special foils are required: print with standard (GCS and GCP) foils.
- Easy to print, cut, weed, and apply.
- Create custom messages and contour-cut shapes.
- Cost effective – print only the quantity you need when you need it.

Print with:

- GERBER EDGE series thermal printers.

Contour Cut with:

- Gerber 15" sprocket plotters.
