

# GAIN A COMPETITIVE EDGE

Equipment & Supplies for FAA/FAR  
Compliant Aircraft Interior Placards,  
Signs, Graphics, and Labels.

# HIGH QUALITY LABELS AND PLACARDS PRINTED IN-HOUSE, QUICKLY AND EASILY.

Gerber Technology's design, print and cut production system offers an easy solution for creating aircraft interior graphics. Gerber offers a wide variety of substrates that comply with FAA/FAR material specs and airline-related UL flammability standards.

The GERBER EDGE® FX™ production system is the right choice for so many applications.

- Interior Label, Emergency and Informational Placards
- Directional and Instructional Signage
- Seating Labels
- Instrument Panels

Being able to produce quality placards and labels in-house means no more waiting for suppliers to meet deadlines, being able to control quality and easily produce samples and prototypes for quick approval.

*The GERBER EDGE FX production system works with EDGE READY™ materials of all types to help you create durable graphics all from one design, print and cut system.*

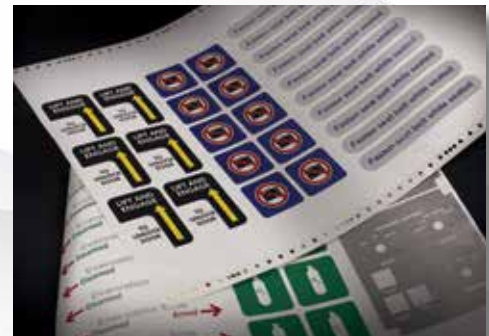

With Gerber Certified Materials you will get the quality and control you need to be more productive.

## LexEdge™ FR65 (10 mil)

- A 10-mil flexible Lexan™-based polycarbonate that meets stringent UL94 V-0 flame-retardant specifications and is compliant with FAA regulations. Ideally suited for placards, labels and decal film for aircraft, electronics and OEM manufacturers.
- Delta, KLM, British Airways, Alitalia, the US Armed Forces, and others rely on LexEdge for consistency, quality, and compliance with FAA regulations.
- Reverse-print on the smooth side of the LexEdge, and graphics are protected by 10 mils of polycarbonate.

## LexEdge II (10 mil only)

- Semi-rigid, 10 mil Lexan with a custom-formulated print surface specifically designed for use with GERBER EDGE® Series printers. Ideally suited for the production of exhibits, displays, signs, and all types of sub-surface graphics.

# FAA/FAR COMPLIANT MATERIALS TO CREATE ALL YOUR AIRCRAFT INTERIOR SIGNAGE.

## Label Stock, 2 mil in White and Matte Silver

### ▪ **UL Recognized**

Polyester, 1- and 2-mil material, custom-formulated for use in Gerber imaging devices for the production of countless commercial and industrial applications which require labels, decals, and identification nameplates, including architectural graphics.

## PermaGrip Label Stock

### ▪ **UL Recognized and GHS Compliant**

Specially designed for application to low surface energy (LSE) surfaces, PermaGrip Label Stock maintains optical clarity in harsh environments. It provides excellent thermal resistance over a temperature range of -40°F to 302°F. Because it is UL-recognized to 302°F and GHS compliant, its durability and versatility make it ideal for use in the transportation and warehousing, waste treatment, refinery, and OEM industries. PermaGrip white vinyl is also available for other applications.

## Luminous Film

- This 9-mil, durable, “glow-in-the-dark” vinyl is custom-formulated for applications that

require maximum visibility for both day and night viewing, suitable for interior safety signage, and identification signs and markings. Gerber Luminous film will “glow” for up to 6 hours and takes only 3 minutes to recharge. Luminous material meets International Maritime Organization, National Fire Protection Association, and Federal Railroad Administration requirements.

## HP 220 White

- High performance 2-mil cast vinyl specifically developed for optimal GERBER EDGE-printing, vinyl cutting, weeding and application. Clear pressure-sensitive adhesive allows production of attractive two-way markings. Excellent durability with five- to eight-year exterior life.

## GerberMask™ Yellow

- Developed as a high-contrast stencil for painted graphics. 4-mil, yellow film with a low-tack adhesive system for use as a stencil mask on smooth, flat surfaces. The yellow face film makes weeding and application much easier especially when the stencil is applied to a white surface.
