# V8.12 Release Notes

Item #	New Features
AIPLUG-1083	**Adobe Plugin:** The Adobe Illustrator plugin includes a Line List application integrating YuniquePLM data while utilizing the flexibility of Adobe Illustrator to create your own collection view.
YPLM-6532	**General Application:** YuniquePLM now offers the ability to perform a universal search across multiple areas/modules across the application. Users can search by code or name (and various other parameters) and find corresponding matching results. This significant click reduction will consolidate results and save time overall by searching in a central location vs separate Modules. To enable, admin users can set up within Admin > Settings > Desktop and then further refine search parameters within Admin > Settings > Universal Search.

UIMOD-6734	**Admin Folder:** The warning messages within the Admin User creation area have been redesigned as popups.
UIMOD-3169	**Color Folder**: Removed a redundant sort column in the Color Palette-Remove Color area.
UIMOD-6763	**Color Folder:** The Color Folder's Edit Color Chip buttons (save, copy, help) have resorted.
UIMOD-6637	**Control Panel:** Updated the Control Panel - BOL Template Library and Style - Bill of Labor user interface to include the unlink symbol after adding a row.
UIMOD-6745	**Control Panel:** The Control Panel Measurement Template includes updates to linked and unlinked icons.
UIMOD-6660	**Material Folder:** Updated the Material Care page where the created by, created date, modified by, modified date detail has been moved to the Care Instructions panel.
UIMOD-3565	**Power Grid:** Updated the Power Grid user experience within YPLM to include new desktop entries in the Admin area specific to Power Grid Entities, allowing the Power Grid user to launch their various business entities from YPLM directly.
UIMOD-6710	**Style Folder:** Updated text within the Style Folder Design Detail, Text -Image, and Freelance Design workflow pages when adding images.
YPLM-5946	**Admin Folder:** Created a new Style application setting to show or hide, both the *Add Size* or *Add Variation* option within the overflow menu. These new settings can be found in the Admin > Settings > Application> Style >General section: EnableStyleAddSize and EnableStyleAddVariation.
YPLM-6681	**Admin Folder:** The Admin Folder - Field Configurations - Field Definitions have been updated to include a specified sort order for dropdown values configured within the Lookup Items Sort area.
YPLM-8045	**Application Configuration:** New APIs have been created to support Style attachments (Add and Remove). This will allow customers to send attachments to the Styles Attachment area via integration.

YPLM-6958	**Color Folder:** Colors can now be copied from within the same Color Palette as the original color chip using the new copy function within the Edit color > Color properties overflow menu. During the copy process, users can modify color chip fields that carry over EAV field data.
YPLM-8218	**Color Folder:** Updated the Color Folder - Change Log to specify which color chips have been copied.
YPLM-8365	**Color Folder:** Updated PANTONE 18-1421 **Cognac** to **Baltic Amber** in the Pantone Library as per Pantone color change communication.
YPLM-7645	**Control Panel:** Improved Copy process to include the currency data when adding a new Style Variation.
YPLM-8278	**Control Panel:** Updated the Control Panel Intro Season Year page to include a configurable grid option to add a current season column for increased visibility and clarity.
YPLM-7837	**Dev Calendar:** Task roles have now been incorporated into Dev Calendar > BI > Calendar extract report.
YPLM-8077	**General Application:** Gerber Technology is working towards a unified Single-SignOn capability across its entire suite of product lines. YuniquePLM is now integrated with Gerber Technologies new services allowing a Single Sign-on (SSO) for all your Gerber Applications. This capability will work with Corporate Federated Authentication services via SAML 2.0 and allow enterprise organizations to enable ADFS, Azure AD, Google, Twitter, and Facebook authentications if desired. YuniquePLM will require a mandatory username, password, and valid unique email address (may not be shared between accounts). Users can now use either their username or email address to log in. There is also a new forgot password link.
YPLM-6200	**Line List:** Updated the Line List Flash Costing Batch Update - Main Material Name dropdown field options.
YPLM-7579	**Material Folder:** The Material > Supplier-Mill > Material Request Summary page now includes a search panel where users can search by Material Request parameters such as Partner (agent/vendor/factory), color, size/treatment, seasonality, and sample type.

YPLM-5525	**Sourcing:** Users can delete a Sourcing Folder if no quotes or commitments exist.
YPLM-7909	**Sourcing:** The Intro Season Year dropdown values have been updated to match the sort order specified within the Control Panel when creating a new Sourcing Folder.
YPLM-7078	**Style BOM:** The BOM Colorway area includes the ability to remove material color pitching from a colorway. This is particularly useful for those users who have *click-to-fill colorway* and *default active color* BOM configurations disabled.
YPLM-8269	**Style Variations:** Created warning messages within the Style BOM to identify when a new size variation may impact color pitching between the original BOM and the size variation created.

Item #	Defect List
YPLM-8036	**Application Configuration:** Corrected a control issue within the Parent / Child EAV fields which resulted in missing values.
YPLM-8316	**Control Panel:** Updated the Control Panel's Fraction Conversion issue.
YPLM-8311	**Style Measurements:** Updated Fraction Conversion within the database to be consistent between page and reports (Style Measurements, Sample Request, and Reports.)
