V8.6 Release Notes

YPLM# New Features

4057	Admin Folder: The Event Notifications now support Line List Create.
AIPLUG-366	Adobe Illustrator Plugin: Users can now create a BOM within the YuniquePLM Design Suite+ Style app. This also includes the ability to assign Colorways to a BOM.
4338	Application General: Relational drop-down selections now automatically filter without the screen refreshing, such as the Class & Size Range selections.
4751	Application Configuration: EAV Multi Select fields now work within the Silhouette Folder.
5371	Application Configuration: The Image Edit > Where Used page OOTB EAV fields are now available for configuration.
5685	Application Configuration: The Line List Showroom now supports EAV fields from the Style Header.
5696	Application Configuration: Updated the Line List Search forms to allow users to hide non-system required fields.
UIMOD-6361	Application General: Certain buttons across the application are now easily identifiable with a grey outline to quickly identify clickable buttons.
UIMOD-6366	Application General: YuniquePLM now has the ability to expand all/collapse all within the new UI pages. EXAMPLE: While viewing pages on a medium thumbnail view, click once on a card to expand only that card and click twice to open all visible cards. Apply the same clicks to reverse the process; click once to collapse only one card and twice to collapse all cards. This function is available across the application.
UIMOD-6393	Application General: The 'Go To' button icon has been updated across the application to accurately represent the function.
4024	Application Setting: Added a setting in PLM to lock the Material Request Partner Fields. If enabled partner fields will only be editable in srmOn. The new setting for the Material area is called, <i>MaterialRequestLockVendorFields</i> .

Yunique PLM 8.6 Release Notes

3522	Control Panel: The Style Category sorting now matches the sort order added within the Control Panel.
4606	Control Panel: The Control Panel - Measurement Template POM Where Used page load performance has been improved.
5520	Line List: The Style Description column has been included in the Line List Sku Plan pages to make it easier for users to identify a desired Style.
5750	Line List: Updated the Line List Style Category sort function to match the sort order defined in the control panel.
5779	Line List: Updated the Line List Showroom workflow page to include a Style Refresh function which adds in Styles that have been created after the Showroom was setup.
870	Measurement Page: The Style Measurement and Sample Request POM Comments now supports up to 80 characters.
5240	Sample Request: Updated the Sample Request functionality to no longer apply automatic updates once a Sample is approved. When a Sample is reopened, it is synchronized with the current Measurement worksheet.
5259	Sample Request: Added a Description field to the Sample Photos tab within Sample Requests. The description field has a character limit of 200.
4112	Style Folder: The Style Copy Sub-Category selection has been updated to filter off of the Style Category selection when copying a style.
5390	Style Folder: The BOM Colorway Color Pitch by Material popup selection now includes the ability to search by Season and Year.
5615	Style Folder: Updated the Style Image panels to only display the Where Used button when an image is assigned.
5877	Style Folder: The Style Tech Pack now includes a new cover page print option (landscape and portrait cover page with season and year) which includes the Season Year selection from the Style.
5828	System Configuration: YuniquePLM has received performance improvements to the back-end Service Bus which helps process bulk jobs.

Yunique PLM 8.6 Release Notes

UIMOD-6381	Style Folder: The Style Folder BOM Setup page has been updated to match the new UI.
UIMOD-6395	Tech Pack: The Tech Pack printout headers now provide users the ability to drag and drop sort the field order.
5617	Batch Queue: The Batch Queue's Add Images to Multiple Styles function has been removed, as it is no longer applicable to the application. Users can manage updates via the Line List.
5675	Line List: The SKU page's Compare function has been removed as it is no longer applicable to the SKU form.

YPLM# Defect List

5639	Admin Folder: Corrected an error within the Admin Folder - Permission Group which occurred when applying a special character “/” for a language translation.
5790	BI Folder: Corrected an issue in the BI Change Log report and the Change Log Summary where modifications made within the Style workflow pages were not recorded.
4229	BOM: Corrected an issue within the BOM and Colorway pages where adding data which triggers a refresh, wouldn’t snap the page back to the area where the user was entering data.
5139	Construction Details: Corrected an issue within the Control Panel Construction Detail Template where the Detail field was not displayed after copying.
5490	Costing Page: Corrected an issue within the Costing page where the costing data was reset after saving.
5342	Line List: Corrected a sort order issue within the Line List’s EAV configurator.
5736	Line List: Updated the <i>Modified By</i> and <i>Modified Date</i> in the BOM and Style Header to reflect any changes made within the Line List.
5146	Measurement: Corrected an issue within the Measurement page where changing a template did not apply the new image.
5477	Style Folder: Corrected an issue where the Style Folder Thumbnail View fields were not translated.
5546	Style Folder: Corrected an issue within the Style Header multi-select fields, where the deselected items were kept after saving the changes.
5879	Style Folder: Corrected an issue with the Style No. Auto-Generation not working correctly in certain setups when creating a new Style.
6076	Style Folder: Corrected an issue with the Style 3D - 360 Image popup not displaying the full image.
5972	srmOn: Corrected an issue where the srmOn measurement edit chart did not contain the Delete POM button.
