V9.0 Release Notes

<i>Item #</i>	<i>New Features</i>
AIPlugin 6.13	AIPlugin V6.13 is optimized for YPLM V9.0 and is compatible with Adobe Illustrator CC (2019) 23-1 to CC (2021) 25.4.1.
YPLM-8634	Admin Folder: Admins can create multiple users with the included "Save & New" user creation option.
PAPI-182	Application Configuration: New Bill of Labor APIs for creating, updating, and deleting operations are included in the YuniquePLM Control Panel for customer use.
UIMOD-6834	Control Panel: The Control Panel's Dimension Types area has been updated to include a new UI in accordance with YPLM-7913 functionality.
YPLM-7913	<p>Control Panel: Users can create sub-groups within existing dimension types listed in Control Panel > Dimension Type area, excluding Color & Size. This feature will assist those customers who have an extensive list within their dimension values to refine, group and pre-filter at the BOM setup.</p> <p>The two fields, "Dimension Type" and "Dimension Item Group", must be enabled within the Style Header EAV configuration page which will pre-filter the dimensions available within the dimension group when setting up their BOM.</p>
YPLM-8469	Costing Folder: Updated the Style Copy Costing Header fields to copy over the Ecom Units and Ecom Margin column value.
YPLM-9074	Construction Details: When relinking construction details on the Style Construction Details workflow, both EAV and OOTB fields from the CD template are reintroduced to the page.
YPLM-8584	General Application: Users can choose a new printout called Style Cover with Comments Portrait available within the Style Header print preview.

YuniquePLM 9.0 Release Notes

<p>YPLM-8824</p>	<p>Material Request: When pitching colors to a Material in the BOM workflow, users can now configure fields from the Material Request submit grid. This includes both OOTB and EAV fields added to the Material / Partner / Material submit grid level.</p> <p>To enable these fields during configuration, select "Material Request Grid Fields" from the expander menu. This will behave similarly to existing functionality whereby users can configure fields from different application areas (e.g., Ability to configure BOM with linked fields from Material header.) This will be available for configuration on the Style workflow within BOM and Colorways pages, where users can pitch material colors.</p>
<p>YPLM-8788</p>	<p>Partner Permissions: The first phase release of our Partner permissions project is here! With the introduction of Partner permissions, srmOn users will ultimately transition to access all of the current shared information from within YuniquePLM instead of a separate application.</p> <p><i>Note - srmOn will still be in use until this is fully rolled out to users.</i></p> <p>Partner Permissions Phase 1 includes:</p> <p><u>New for the YuniquePLM user</u></p> <ul style="list-style-type: none"> Create Global Partner User groups Share styles Share Tech packs NEW Tech Pack Mass download <p><u>New for the Partner User</u></p> <ul style="list-style-type: none"> Log into Customers YPLM instance View User profile Partner Folder Resource Folder Partner user groups View Shared Styles Access Tech packs NEW Tech Pack Mass download
<p>YPLM-9055</p>	<p>Profile: Enterprise Authentication users can update their YuniquePLM password details within the User Profile area.</p>
<p>YPLM-8556</p>	<p>Sample Request: Within the Sample Request workflow page, the Photo tab now includes the ability to hide the Photo description field via the new EAV configurability editor.</p>
<p>YPLM-8603</p>	<p>Sample Request: The Sample Request predefined reports area includes new AccuMark Model reports.</p>

YuniquePLM 9.0 Release Notes

<p>YPLM-8786</p>	<p>Sample Request: Updated the Sample Request's Submit - AccuMark Model area from allowing users to select duplicate models.</p>
<p>YPLM-7896</p>	<p>Style BOM: Users can now create a Parent & Child relationship within the Bill of Material workflow. Any Child BOM created will be synchronized to its Parent's dimensions like Color, Size, etc. For example, if a color is added or removed from the Parent BOM, then it is also updated on the Child BOM.</p>
<p>YPLM-8174</p>	<p>Style BOM: Users can now lock a BOM dimension depending on a Style's status. When the Style's status is set, active dimensions become locked, and the user cannot remove, drop or swap the dimension.</p> <p>To enable: In the Control Panel > Status, for each status created, new fields 1) <i>Lock Dimension</i> 2) <i>Dim not to lock</i>, 3) <i>Active Dim to lock</i> will be displayed</p> <p>This will determine if that particular status (when selected) will lock the dimension(s) of the style.</p> <p><u>Setting Definitions:</u> <i>Lock BOM Dimension</i> Lock: Will initiate lock Unlock: Will allow to unlock dimension. If unlock is selected, dimensions selected in <i>DIM not to lock</i> and <i>Active Dim to lock</i> will play no role in lock logic. If unlock is selected from the dropdown list for (Lock BOM dimension field), then <i>DIM not to lock</i> and <i>Active Dim to lock</i> fields should be left null. Note: The selected status will have no effect and the system will never lock any dimension.</p> <p><i>DIM not to lock:</i> If <i>Lock BOM dimension</i> is set, this dimension will remain "unlocked."</p> <p><i>Active Dim to Lock:</i> If <i>Lock BOM dimension</i> is set, this dimension will be "locked."</p>
<p>YPLM-8744</p>	<p>Style Care: The care instruction details are now translatable for the available reports within the Care workflow.</p>
<p>YPLM-7904</p>	<p>Style Folder: We've created some new logic tied to the app setting <u>HeaderStatusManagement</u> found within the Admin>Setting> Application>Style area.</p> <p>When enabled, the Style Header status will revert to <i>In Progress</i> when a Style and its related data is modified. This functionality is similar to our existing Tech Pack change management status updates, where icons change from red to green if certain style data is updated.</p>

YuniquePLM 9.0 Release Notes

<p>YPLM-4818</p>	<p>Style Folder: The Style Header has a new feature that checks for empty fields when the Style's status has been modified, such as from <i>In Progress</i> to <i>Approved</i> status.</p> <p>When a user changes the status from the Style Header, the 'Field Validation Rules' will check the Style's data based on the implemented configuration within the Admin area. The user will receive a warning if any required information is missing in the Style Header or Style Feature (Style Detail tabs).</p> <p>Users' can configure this feature within the Admin > Field Configurations > Field Validation Rules. This functionality allows the user to implement configuration based on mandatory fields within the Style Header based on Calendar Status, Style Type, Division, etc.</p>
<p>YPLM-7894</p>	<p>Style Folder, Material: Multi-level BOM functionality is now available in the Style and Material workflows, providing an association between the Style and Material exists.</p> <p>Users can enable the <u>StyleSyncWithMaterial</u> setting found within the Admin>Setting>Application>Style area. Once enabled and a Style is created, a corresponding Material is also created in the Material Folder. This Material will be synced with the original source Style and can be used as a component on any Style's BOM.</p>
<p>YPLM-8753</p>	<p>Style Folder: Updated the Construction Details Template to ensure data contained within EAV fields retain their values when added to a Style via the CD library from the Control Panel.</p>
<p>YPLM-8806</p>	<p>Style Folder: Users can search by Dev No within the copy search grid when copying Style workflow pages.</p>
<p>YPLM-8610</p>	<p>Sourcing Folder: Users can filter by style type when adding a style to the Sourcing Folder.</p>

Item #	Defect List
YPLM-9028	Admin Folder: Corrected the email notification "From" field to include the user name.
YPLM-9092	Admin Folder: Corrected an issue within the Admin> View> MailHandler where the Style Header EAV fields were not added to the email notification.
YPLM-8650	Line List: Corrected an error that resulted from sorting EAV fields on the Line List SKU Plan page.
YPLM-8731	Style Folder: Corrected a text wrapping issue for Model location name when viewing Style model details in Edit View
YPLM-8755	Style Folder: Corrected a sort order issue on the Design Detail Custom grid when copying from one Style to another.
YPLM-8945	Style Folder: Updated the Construction Details page, which was not sorting CDs correctly.
YPLM-9005	Style Folder: Corrected the Style Design Detail printout to match the onscreen details.
YPLM-9106	Style Folder: Updated the SKU workflow to automatically synchronize data when related BOM updates have been made.
